◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◊ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

◆ Discontinued

The manufacturers report their devices can be used as direct replacements.
Performance details often differ, so compare the specifications considering your requirements.

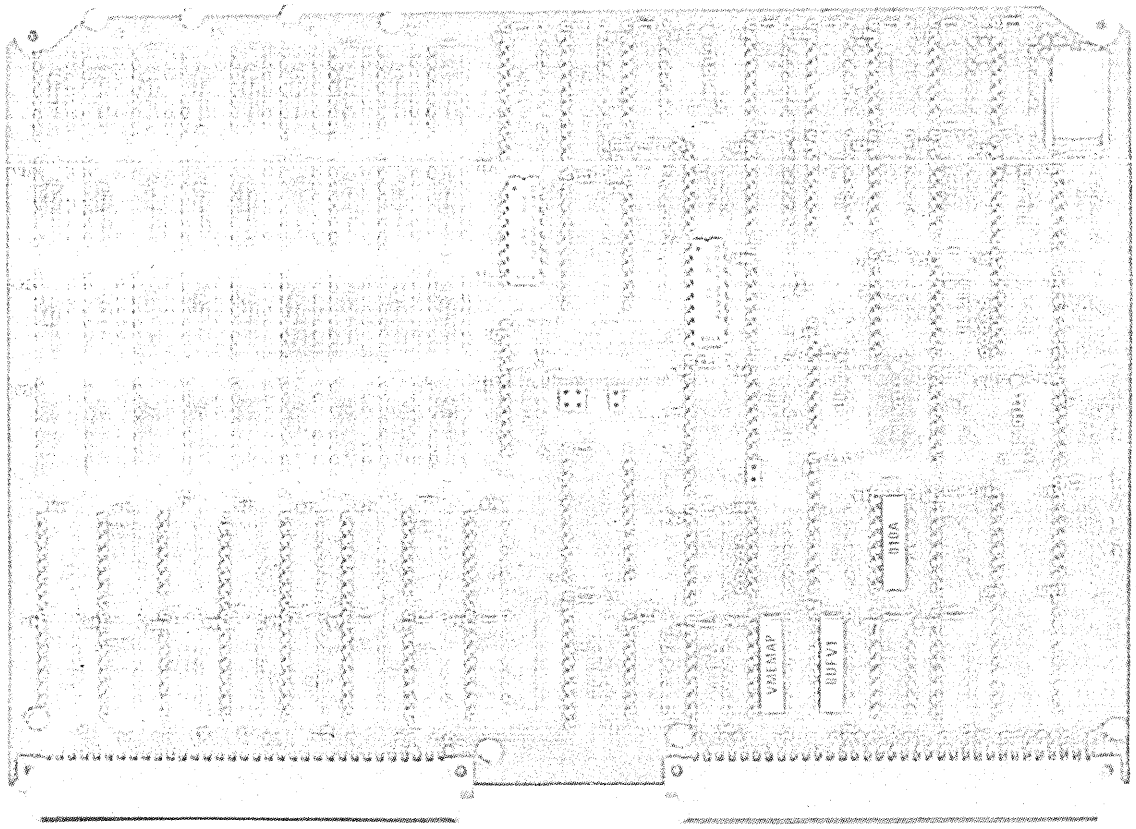
For Key Data On Every IC On This Board, The Place To Look Is...



This Signetics Memory Module provides 256K bytes of dynamic random access memory, plus parity protection.

Equipment and system design often require the use of a wide variety of integrated circuits in order to obtain optimum performance. One way for an engineer to be certain that he hasn't overlooked the best device for his application is to refer to the pages of IC MASTER.

Surveys conducted by IC MASTER, integrated circuit manufacturers, and independent research agencies confirm that four out of five IC MASTER users have specified one or more products as the result of using IC MASTER.

Device No.	Description
74LS00	Quadruple 2-Input NAND Gate
74LS08	Quadruple 2-Input AND Gate
74LS04	Hex Inverter
74LS20	Dual 4-Input NAND Gate
74LS32	Quadruple 2-Input OR Gate
74LS37	Quadruple 2-Input NAND Buffer
74LS24	Schmitt Trigger
74LS74	Dual D-Type Edge-Triggered Flip-Flop
74LS132	Quadruple 2-Input Schmitt Trigger
74LS112	Dual J-K Edge-Triggered Flip-Flop
74LS10	Triple-3-Input NAND Gate
74LS244	Octal Buffer/Line Driver
74LS645	Octal Bus Transceiver

MANUFACTURERS AND DISTRIBUTORS/ REPRESENTATIVES DIRECTORY

The Manufacturers and Distributors/Representatives Directory is a comprehensive telephone directory of the entire IC industry. It places at your fingertips the names and phone numbers you need to know. It includes manufacturers, international sales offices, representatives and distributors; for manufacturers with data pages, it also includes domestic sales offices, representatives and distributors. The manufacturers' listings tell you where and whom to call to obtain technical and ordering information. It enables you to ask for the right person or phone extension. It gives you the terminology understood by the individual company's switchboard operators, e.g., in some companies you should ask for sales, in others, customer service. This directory will reduce frustration and save you time.

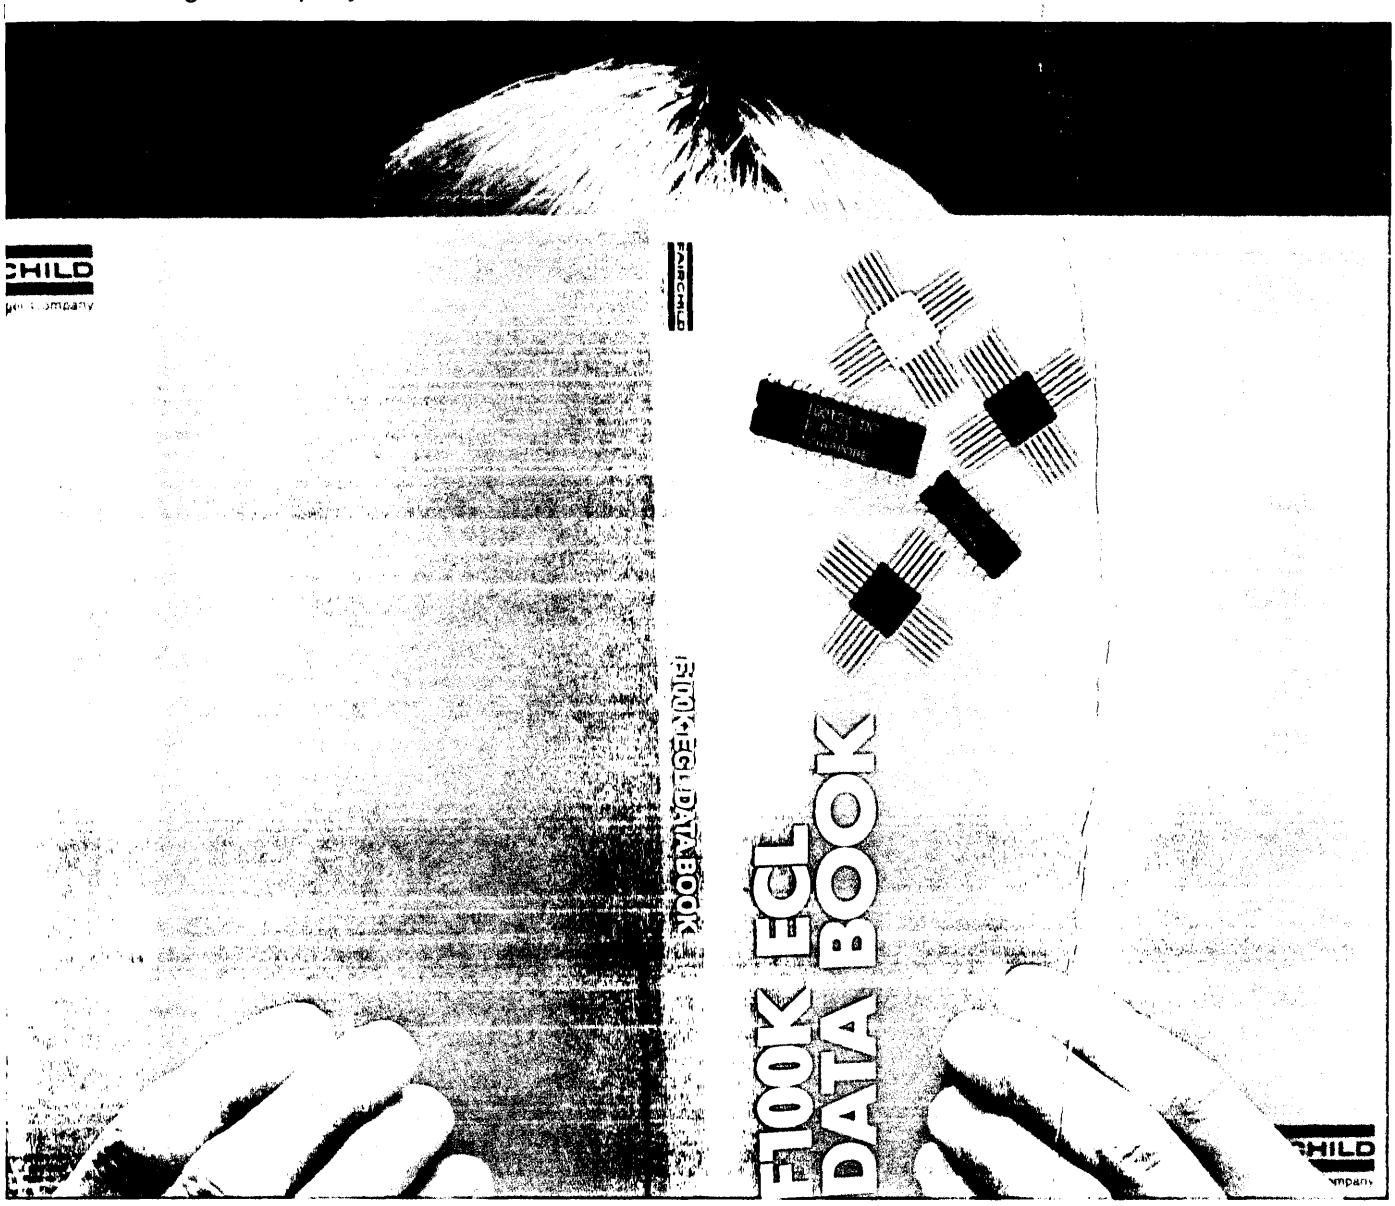
FAIRCHILD

A Schlumberger Company



Speed reading.

In high-performance applications, if you want speed, you have to go F100K. If you want F100K, you have to go Fairchild. And if you really want to do it right, you have to go by the book. The F100K ECL Data Book.

It's filled with all kinds of incredible specs. Did you know we have a complete logic family of 38 devices with 4 new ones planned for 1983? Did you know we've got logic internal gate delays of 750 ps—with all parts available in both DIPs and Flatpaks? There's voltage and temperature compensation for ease of use. And delivery times almost as fast as the parts themselves.

F100K. For sizzling reading, just call or write Fairchild Advanced Bipolar and request the F100K Data Book or User's Handbook.

441 Whisman Rd.,MS 23-1250, Drawer #7283, Mountain View, CA 94039. Telephone (415) 962-2356.
